### **Rector's scholarship – academic achievements section**

The procedure of assigning points for academic results to students is based on calculating a student's average grade into points according to the formula presented in the table below:

Criterion	Type of achievement, characteristics	Points	Documentation, manner of confirmation
-----------	--------------------------------------	--------	---------------------------------------

<b>Grade average (max 10 points)</b>	The average of 4.0 (the lowest entitling) to 5.0 The number of points for grade average = (grade average – 4.00) x $W_{Si}^* + 1.00$	<b>0-10</b>	Student credits card on the basis of which a dean's office staff member confirms the grade average and the date of obtaining credit for the year of study
--	---	-------------	---

\*  $W_{Si}$  coefficient is calculated separately for each group when giving points for academic achievements (depending on the mode of study/year/field of study)

$$W_{Si} = \frac{9}{(\max(average_i) - 4.00)} \text{ for } \max(average_i) > 4.00$$

$\max(average_i)$  – maximum average value in a given group when giving points for academic achievements (for the mode of study/year/field of study).

In case when  $\max(average_i) = 4.00$  the number of points for the grade average = 10.
