

Women Empowering the IT Industry: The 10th Anniversary Edition of Tech Leaders Poland Opens New Opportunities

For the 10th time, motivated women eager to grow in new technologies will have the chance to participate in a professional mentoring program. Experts united under the Women in Technology Poland community are working diligently to prepare the anniversary edition of a project that has supported the development of hundreds of women in IT over the past decade. Recruitment for the program starts on **January 8, 2025**.

Enthusiasts of programming, user experience, artificial intelligence, project management, or entrepreneurship will have four months to grow under the guidance of accomplished mentors. This special anniversary edition is an opportunity to celebrate ten years of inspiring stories and positive professional and personal transformations.

A Unique Space for Growth

The strength and value of Tech Leaders lie in creating a space where women—regardless of their age or experience—can acquire new knowledge and enhance their professional skills. Renowned specialists from the IT and technology sectors support participants in achieving their goals.

In addition to one-on-one mentoring sessions, mentees gain access to **Mentors4People workshops** and consultations with HR experts. This comprehensive support makes Tech Leaders one of the largest free mentoring programs in Poland.

How to Join?

The program will run from **February to June 2025**, with the application form available on www.techleaders.eu starting January 8, 2025. Applications will be accepted until January 17, 2025, and the program officially kicks off on February 17, 2025, running until June 17, 2025.

This year, participants will have the opportunity to draw from the expertise of leading specialists in various IT fields. Mentors will select their mentees from submitted applications, ensuring the best match for their areas of expertise.

Success Through Collaboration

The 9th edition of the program welcomed over 140 experts, offering mentoring in fields such as UX, backend, frontend, artificial intelligence, and project management. The program received an average rating of 4.8/5 upon completion, with one-third of participants shifting their career goals during the process.

Tech Leaders not only provides mentees with a path to growth but also offers mentors a rewarding experience as they guide new talents in IT.

A Shared Mission with Partners

Tech Leaders is supported by industry leaders—companies and organizations that understand the importance of empowering women in IT. The program has gained the trust of notable partners, including **Google, Stanford University, Sabre Poland, Glovo, Ringier Axel Springer Tech, OANDA, HEINEKEN Kraków, Philip Morris International, Motorola, EPAM Poland, GlobalLogic, Aptiv, SpeedUp Group, ShopRunner, Accenture, Aquiva Labs, Brainly, Appliscale, Nokia Poland, and StoneX Poland**. Thanks to these collective efforts, the representation of women in STEM careers in Poland is steadily growing.

The program is organized by the Imagine Inclusive Technology Foundation, which oversees the Women in Technology Poland community. The foundation's mission is to enhance women's professional competencies, support their leadership development, and promote diversity in the tech industry.
